CALL FOR POSTERS:

Workshop on basic research with Transcranial Magnetic Stimulation (TMS)

Macquarie University, Sydney
30th June - 1st July, 2011

The workshop, to be held at Macquarie University, will be a forum to learn about and discuss research applications of transcranial magnetic stimulation (TMS), including applications in cognitive psychology and motor control. The focus of the workshop is not only on presenting completed research projects, but is also a forum to discuss the types of problems that TMS can solve and to discuss research plans. The workshop will be an intimate event, with several lectures in the morning, together with ample time set aside for discussions among the participants. The afternoon sessions on both days will feature hands-on TMS tutorials. No prior knowledge of TMS is assumed, and students are particularly encouraged to attend.

The confirmed speakers for the event include:

Chris Chambers (Cardiff University)
Justin Harris (University of Sydney)
Arman Abrahamyan (University of Sydney)
Paul Sowman (Macquarie University)
Marc Kamke (University of Queensland)
Martin Sale (University of Queensland)

On the first evening, we will hold a poster session for presentations primarily by graduate students. The idea behind the poster sessions is for students to present research proposals for studies using TMS, and to receive feedback on their proposal from the participants at the workshop.

If you are planning on attending, please register at: http://tinyurl.com/TMS-workshop-registration by 23rd June. If you plan on presenting a poster (highly encouraged!), please include a title and brief abstract. There will be no charge for the event.

For any further queries, please contact Jason Friedman [jason.friedman@mq.edu.au]

Organising committee: Paul Sowman, Anina Rich, Mark Williams, Matthew Finkbeiner, Jason Friedman (ARC Centre of Excellence in Cognition and its Disorders (CCD), Macquarie University, Sydney)
